Catching the Process Fieldbus
An Introduction

What is PROFIBUS? What about PROFIBUS PA, PROFIBUS DP, Profisafe and Profidrive? How does the protocol basically work? What are the major components? What are the user benefits of PROFIBUS?

You are invited to attend this FREE 1/2-day seminar to learn the answers to these questions from James Powell of Siemens Canada as he visits Scotland as part of his European Seminar tour. James is Siemens lead technical trainer for communication systems and has over 20 years experience in application design and research, as well as many years of field experience and is a regular presenter at the UK profibus international conference. He has troubleshooted many PROFIBUS networks and has conducted technical training classes around the world. Each attendee will receive a complementary copy of ‘Catching the Process Fieldbus – An Introduction to PROFIBUS for Process Automation’ by James Powell and Henry Vandelinde.

10th March 2011: Elite Controls Ltd, Elite House, Starlaw Business Park, Livingston, EH54 8SF
